Incident Response Summary

Incident Analyst: Adam Nizich

Date: 3/2/20206

Incident Overview

Briefly summarize what happened (2-3 sentences):

The online retrail company QuickCart experienced a data breach from a phishing email. The email contained a link to reset a password. The link was clicked on which enabled a hacker to make data form 5,000 customers available to the public through a forum online.

Incident Timeline

Briefly list the key events (times and actions):

1. On April 3rd 2025 at 3:40 pm an email was sent to Michael Tan requesting a password reset. At 3:52 the the password reset was intialized causing the data breach

2. On April 7th at 9:00 am QuickCart notified the cybersecurity response team about the data breach incident

3.

How Did the Breach Occur?

Briefly explain the method of compromise:

The method of compromise was through email. Michael Tan clicked on a password reset link via a phishing email. That link enabled a hacker to breach and release customer data to an online forum

What Was Accessed or Compromised?

List clearly the specific data or assets compromised:

- The data compromised was customers information, such as phone numbers, email and physical addresses, bank account informnation, and card information.
-

Recommended Immediate Actions

List two immediate actions clearly:

1. Have the company establish a two method authenticator. That way hackers will not be able to breach going forward

2.

Proposed Policy Change

Clearly state one recommended policy improvement:

- Implement and require monthly meetings to maintain ordinance and supply trainning to all employees.
